

Product Name :
Bomb Suppression Blanket

Product Code :
UAEBOMB0003

Description :

Bomb Suppression Blanket

Technical Specification :

The Blast Containment Ring is first placed on its edge around the suspected bomb/improvised Explosive Device (IED) and the Bomb Suppression Blanket is then placed over the Blast Containment Ring and suspected bomb, while awaiting examination. This combo deters side fragmentation discharge as well as top discharge. (The Bomb Suppression Blankets are used in conjunction with the Blast Containment Ring) Should a detonation or explosion occur, the ring directs the force of the blast upwards and the Blanket flexes and contains most of the fragments created by the explosion, so that the damage to personnel or property in the area is considerably reduced. It provides prompt and effective method for dealing with suspected packages.

Bomb Suppression Blanket (BSB) is available in various sizes:

100 x 130 cms
