Product Name :
High Quality Stainless Steel CIP Washing Cleaning
Machine For Pipes

Product Code :
PERT0001

Description :

High Quality Stainless Steel CIP Washing Cleaning Machine For Pipes

Technical Specification :

The Industrial CIP Washing Machine is widely used in food ,drinks,wine, and medicine processing industries; pre-process system, blending system, the pipeline, all kinds of storage tanks, heat exchanger,filling machine in dairy or beverages industry containers, etc

The Industrial CIP Washing Machine is widely used in food ,drinks,wine, and medicine processing industries; pre-process system, blending system, the pipeline, all kinds of storage tanks, heat exchanger,filling machine in dairy or beverages industry containers, etc.

CIP is locally known as in situ cleaning system, referring to CIP, also known as cleaning position or positional cleaning (cleaning in place). Cleaning in place means not open or move device, which is, using cleaning fluid which is high temperature and high concentration to impose force on device equipment, thus cleaning the contacting surfaces. It is suitable for cleaning and purity of production device which is of high demand to sanitary level.

Industrial CIP Washing Machine 's Characteristics:

Economic operation, low cost, compact structure, small area, simple installation and maintenance.

Processed in confined equipment (tank containers and pipeline), thus greatly reducing the chance of secondary contamination.

Can clean several district at the same times, it also can clean during the production process. Thus greatly reduced the production time of the CIP cleaning.

It can automatically switch process parameters and adjust cleaning time, PH, temperature and other parameters.

Especially the automatic CIP can automatically detect, plus liquid, emissions, display and adjust to cleaning fluid. It is more in line with sanitary requirement and production environment demand of modern large-scale fluid drugs and food processing because its reliable operation, high automation, simple operation and good cleaning effect. All operations can be recorded to facilitate GMP certification.

CIP Cleaning System divided into one-piece type, dual tanks and multi tanks
