Product Name :

Climate chambers SCRC and KDSC smoking and ripening chamber

Product Code :

UAEMET0001

Description :

Climate chambers SCRC and KDSC smoking and ripening chamber

Technical Specification :

Adjustment ranges: – temperatures from 12 to 30 °C

humidity from 50 to 98%

speed of air flow from 0,1 to 2 m/s

the product is placed and transported on movable universal frames

the number of loadable frames with the product (1000?1000?1970 mm) – 10 pcs.

active exhaust ventilation system with adjustable modes

automatic control and regulation system based on the controller with a 5.7 “touch screen

the presence of temperature sensors in the chamber, the temperature in the product and the relative humidity of the working medium

automatic regulation and maintenance of relative humidity and temperature in the chamber

pneumatic control system for air dampers

Frequency control of the rotational speed of the ventilation fan motor

frequency control by the speed of rotation of the exhaust fan motor

installed power of electric motors of all groups, when using frequency regulation of the speed of rotation of circulating engines up to 13 kW.

installed capacity of electric heating elements for heating the camera – 24 kW.

built-in stainless steel evaporator with a capacity of up to 24 kW in the cold (on all types of chambers)
