Product Name :
Drying Fish Equipment UVR. 3rd Generation

Product Code :
UAESH0001

Description :

Drying Fish Equipment UVR. 3rd Generation

Technical Specification :

This is the 3rd generation drying cameras that we produce. The most effective due to the large air flow, powerful dehumidification. Installation is universal for a horizontal fillet of fish or straw, and for whole fish vertical linkage. That makes it universal for all fishery products, including caviar, seafood and sticks.

Equipped with a logical control drying cameras UVR 3 using a high-speed in-line air flow, thermal technique that allows drying meat or fish and other food products in an optimal and high-efficiency mode with dehumidification. Drying process is made due to 3 factors: air movement, dehumidification and active evaporation of moisture due to the difference in temperature (heating). These 3 methods allow you to quickly, evenly and efficiently to make drying fish.

Block unit (heating equipment and air delivery) is made of galvanized steel, reversible.

The dehumidification plant (2 evaporators inside the chamber) with total capacity of 15 kW.

Automatic control panel, on the basis of the
Automatic humidity control system

Power control cabinet. Automation and electrical systems of German production.

Measuring sensors. 1 of the sensor shows temperature of the fish during the drying process.

2 refrigerating units with a total capacity of 15 kW of cooling.

The ceiling grid for the organization of horizontal flow

Alignment system of flows in height. This provides uniform drying throughout the entire height of the cart.

Customized size and specification as per your drawing or sample. We Drying Fish Equipment UVR. 3rd Generation suppliers UAE Dubai, can make the Drying Fish Equipment UVR. 3rd Generation as per your request, specification, size and bulk quality Dubai.
