Product Name :
Concrete Strength Testing Machine

Product Code :
EQUP-UE-ACE001

Description :

Concrete Strength Testing Machine

Technical Specification :

The pressure testing machine to achieve automatic control of the test process. Automatic lock broken peak, can print the test results, the test process can terminate the test at any time.

Can automatically save the test data, power-down can be saved, a total of 3000 sets of data can be saved (a group of data can be a single block of data or 3 data), and the saved data query and 3. Pressure display: five digital display pressure kN (kilonewtons). During the test, the pressure is displayed in real time. After the test, the breaking peak remains displayed

Terminate the test: If there is any problem during the test, press "Stop" to cancel the test and re-insert the test piece until the test piece breaks.

Data Storage: The data stored in the pressure testing machine system can still be retained after the power is cut off. After the power is restored, the original data print report can be retrieved.

Max pressure: 100kN 200kN 300kN

level of accuracy: 1

measurement range: 2%~100%F·S

indication accuracy: $\pm 1\%$

Displacement display resolution: 0.01mm

Displacement rate control adjustment range: 0.05~25mm/min

Effective compression stroke: 80mm

Up and down the maximum spacing plate: 220mm

Pillar center spacing: 300mm

Customized size and specification as per your drawing or sample. We Concrete Strength Testing Machine

suppliers UAE Dubai, can make the Concrete Strength Testing Machine as per your request, specification, size and bulk quality Dubai.
