

Product Name :
Concrete Mixer

Product Code :
EQUP-UE-MXE0001

Description :

Concrete Mixer

Technical Specification :

The concrete mixer has a rated discharge capacity of 1500 liters each time. It is applicable to various industrial and civil construction projects such as prefabricated component factories, highways, bridges, water conservancy, ports, and docks. It can mix dry and hard concrete, plastic concrete, fluid concrete, lightweight aggregate concrete and various kinds of mortar.

Main features:

Double-horizontal compulsory shaft

The compulsory concrete mixer can not only stir the dry hard concrete, but also can mix the light aggregate concrete, so that the concrete can achieve a strong mixing effect

Pneumatic discharge

The discharge door is installed at the bottom of the mixer and the discharge is started through the cylinder. As well as the open and close positions of the dischargers, the discharge doors can be sealed by adjusting the position of the seals.

long service life

Imported components are used, and the diameter of the mixing drum is less than half that of the vertical shaft with the same capacity. Therefore, the blade rotation speed is less than half of the vertical shaft type, so the blade and the liner wear little, and the service life is long.

Input capacity (L): 2400

Output capacity(L): 1500

Productivity(m³ /h): 75

Aggregate size (egg/broken) mm: 80/60

Mixing blade: quantity 2×8

Mixing motor: power(kW) 2x30

Hoist motor

power(kW): 18.5

Water pump: Power(kW) 3

Overall Dimension (mm): transportation 5250x2480x2880

working: 11700x3880x8650

Discharging height(mm): 3800

Customized size and specification as per your drawing or sample. We Concrete Mixer suppliers UAE Dubai, can make the Concrete Mixer as per your request, specification, size and bulk quality Dubai.
