

Product Name :
Diesel Concrete Mixer Machine

Product Code :
EQUP-UE-MXE0002

Description :

Diesel Concrete Mixer Machine

Technical Specification :

This machine is a double-taper type mixing drum with forward stirring, reversal discharging and self-dropping concrete mixer, which can stir plastic and semi-rigid hard concrete. The local mixer drum is rotated by a ring gear and compared with a friction type mixer, it has a transmission. Reliable, fast unloading speed of hopper, non-stick material, no-slippage in rain and fog weather, etc. The hopper mouth falls below the bottom surface, which can greatly reduce the labor intensity of the loading workers. If it is used in conjunction with the batching machine, it can form a simple electronic metering mixing station. The whole climbing machine main engine mixing and hopper lifting is divided into two motors and two speed reducers. To complete, compared with the half-climb mixer, the load of the main reducer is reduced, and the dedicated reducer for lifting the hopper is added, so that the service life of the main reducer is greatly extended.

Input: capacity(L) 480 560 560

Output: capacity(L) 300 350 350

Productivity: ?m³/h? 9-12 10-14 10-14

Mixing motor: power 4 5.5 5.5

Elevator motor: power 4 5.5 5.5

water pump: motor power 0.55 0.55 0.55

Mixing speed: ?r/min? 17 14 14

Aggregate: diameter 40-60 40-60 40-60

Customized size and specification as per your drawing or sample. We Diesel Concrete Mixer Machine suppliers UAE Dubai, can make the Diesel Concrete Mixer Machine as per your request, specification, size and bulk quality Dubai.
