

Product Name :
Cement Block Hydraulic Machine

Product Code :
EQUP-UE-BMM0009

Description :

Cement Block Hydraulic Machine

Technical Specification :

Compact structure: The concrete block forming machine is made of high-strength steel and special welding technology, which is extremely strong.

Distributor: Using sensor and hydraulic proportional valve drive technology, under the action of swinging distributing cart and arch breaking mechanism, forced centrifugal unloading is produced, and the distributing is fast and uniform, which is particularly advantageous for thin-walled and multi-hole cement products.

Control system: The concrete block forming machine computer controls the man-machine interface. The control appliances are all The control program integrates 20 years of actual production experience , Developed in accordance with the international development trend, designed and compiled to meet the national conditions. It can be operated without professionals and only needs simple training. The powerful memory can be upgraded.

Pallet size: 1100x680?

Vibration type: Frequency, amplitude

Excitation frequency: 0?65HZ

Power: 42.15 kW

Customized size and specification as per your drawing or sample. We Cement Block Hydraulic Machine suppliers UAE Dubai, can make the Cement Block Hydraulic Machine as per your request, specification, size and bulk quality Dubai.
