Product Name :
Concrete Block Mould

Product Code :
EQUP-UE-MUD0009

Description :

Concrete Block Mould

Technical Specification :

Concrete block mould uses computer-aided design (CAD), which means that the mould is optimized through a computer-centric system. According to the structural characteristics of the mold, the mold is divided into a planar stamping die and a cavity die with space. The punching die is precisely matched to the size of the punch and the die, and some of them are even without clearance. Other forging dies, such as cold extrusion dies, die casting dies, powder metallurgy dies, plastic dies, rubber dies, etc., are cavity dies that are used to form three-dimensional shaped work pieces. The cavity mold has dimensional requirements in three directions of length, width, and height, and the shape is complex and manufacturing is difficult. Mold production is generally single-piece, small batch production according to strict and precise manufacturing requirements, utilized more sophisticated processing equipment and measuring devices.

Accurate size, smooth surface

Reasonable structure and high production efficiency

Easy to automate

Design meets process requirements, economical and reasonable

Carbide insert progressive die to increase service life

Customized size and specification as per your drawing or sample. We Concrete Block Mould suppliers UAE Dubai, can make the Concrete Block Mould as per your request, specification, size and bulk quality Dubai.

Concrete Block Mould Suppliers UAE, Exporters Dubai
