

Product Name :
PET Strap Green

Product Code :
EQUP-UE-ACE0004

Description :

PET Strap Green

Technical Specification :

In the case of the same specifications, the same length, and the same goods, the weight of the PET strapping is only 1/6 of the steel strap. According to the market price plan of both parties, using plastic steel strapping instead of steel strapping can save at least 50% Packaging cost. ?????

Plastic steel strapping has 10%-14% elongation and tightening rate, while iron strapping or steel wire has only 3-5% elongation and tightening rate. In other words, plastic steel strapping is in the process of tightening. It will be tightened more tightly than the steel belt, and it is not easy to come back loose. In addition, when the bundled cargo is impacted by a strong external force, there is a buffer elongation of 10-14%, which is not easy to cause direct breakage, and ensures the safety of the cargo. ??

At the same time, the plastic-steel packing belt combines the characteristics of plastic, and there is no sharp edge of the steel belt, which will not cause damage to the packaged object, and will not cause any harm to the operator during the packing and unpacking process.

The surface of the PET strap belt is green with embossed patterns, and there are lines on both sides of the belt, which greatly increases the friction, not only keeping the strapping force for a long time, but also easy to pack with the strapping machine, and it is not easy to break after packaging. The exterior is bright and beautiful, and it is the mainstream product in the PET plastic steel belt market.
