

Product Name :
Cement Grain Silo

Product Code :
EQUP-UE-STL0003

Description :

Cement Grain Silo

Technical Specification :

All steel plates of cement grain silo are made of high-quality hot-dip galvanized sheet. All parts are standard components and they have replaceability. In case of any damage or corrosion during use, users can easily replace damaged parts and prolong their service life. The height and diameter of the steel silo can be selected within a relatively large range. The distance between the two silos can be less than 80cm. It has a small footprint and strong adaptability. The maximum capacity of this type of silo can reach 15,000 tons/bin. High space utilization. Prefabricated steel silos can occupy a small amount of land, occupying only a high space, and can meet the requirements for large-tonnage storage.

It is easy to store, simple to use, has good storage effect, and has a long time. Now the steel silo has got rid of the simple storage stage in the past. Due to the continuous improvement of technology, ventilation technology, temperature measurement technology, insulation technology, refrigeration technology, etc. The quality of deposits in steel silos continues to increase and the storage time can reach 3-10 months.

During normal use, if the grain in the warehouse rises to a critical point due to high moisture content, the matching temperature measurement system will promptly report to the sound and light, telling you that there is danger in some part of the grain, and ventilation should be used to reduce the temperature.

The diameter of steel silo can be arbitrarily chosen between 2.7 and 32m.

Customized size and specification as per your drawing or sample. We Cement Grain Silo suppliers UAE Dubai, can make the Cement Grain Silo as per your request, specification, size and bulk quality Dubai.
