

Product Name :
Bolted Cement Silo

Product Code :
EQUP-UE-STL0005

Description :

Bolted Cement Silo

Technical Specification :

The bolted cement silo with sheet cement is a new type of cement warehouse that can be used after being transported to the construction site and assembled with bolts after modularized production and processing. All parts of this type of bulk cement silo are finished by mechanical processing, have advantages like beautiful appearance, short construction period, convenient installation and centralized transportation, free from the traditional on-site production which has the rough and condition-limited defects caused by manual welding, gas cutting, etc.,

bolted cement silo mainly includes dust catcher, arch-breaking device, level measurement and ladder.

Dust catcher: The top of the cement silo is equipped with an electric dust catcher, which can effectively adsorb the suspended particles in the granary and reduce the pollution to the surrounding environment.

Arch breaker: The cement cone is equipped with an air-blast arch-breaking device in the lower cone, and the small electromagnetic directional valve in the air-controlled tank is used to control the release of compressed air to break the arch of cement and various powders to avoid powder accumulation and blocking.

level measurement: can sense the storage height of the material in silo

Customized size and specification as per your drawing or sample. We Bolted Cement Silo suppliers UAE Dubai, can make the Bolted Cement Silo as per your request, specification, size and bulk quality Dubai.
