

Product Name :
Plastic Traffic Barrier with Rubber Base

Product Code :
UAETRIC120004

Description :

Plastic Traffic Barrier with Rubber Base

Technical Specification :

Plastic Traffic Barrier Traffic Drum Traffic Control Drum, Plastic Barrier, Plastic Drum

Diameter: 18" (about 460 mm)

Height: 36" (about 1000 mm)

Weight: About 15 kgs (base 9kgs, body 6kgs)

4 pieces reflective tape as per photo

Features

Durable, blow-molded construction

Low-density polyethylene

5-Tier Telescoping Design

Built-in carrying handle on drum and base

Positive-locking grip between drum and base

Four available base options with anti-rotation knob

Shift-resistant base design

Light attachment on both sides

UV stabilized bright orange polyethylene is formulated to resist fading and discoloration

The barrel body and bottom section both incorporate a non-circular cross section to inhibit rolling after impact

Designed with a larger, flared base. This design allows us to increase the flat edges around base to offer more resistance to rolling when knocked over and lying on its side.

Application:

Reduce the harm for the cars, passengers and workers in the rail. Bright in color, instruct the Road clearly. Connecting with each other make the complete endure power much stronger.
Easily moved, no need to use crane, save labor and cost
Flexible apply to any road
Protect the surface of the road without future work on it
Easy to store, it can stack up to save storage space
