

**Product Name :**  
Portable Speed Hump Collapsible Speed Bump

**Product Code :**  
UAETRIC230001

**Description :**

Portable Speed Hump Collapsible Speed Bump

**Technical Specification :**

Extensive Length: 3 meters

Width: 250 mm

Height: 50 mm

Weight: 13kgs

**Features**

Controlling vehicle speed with a speed bump or speed hump is the most effective method to improve the safety of a parking lot, driveway or private lane.

High visibility speed bumps/humps and signs are the best way to communicate to drivers to keep their speed to a minimum.

Speed humps are raised devices, parabolic in shape, placed across the road to slow traffic.

The sloped design over a 7 or 14 foot length of space encourages cars to slow down without coming to a halt.

Often considered the most traditional physical traffic calming solutions, speed humps calm traffic more gradually than speed bumps, although less so than speed tables. They are ideal for residential roads and are generally used to bring speeds to between 10-20 mph.

Speed humps should ideally be installed in a series to create ongoing traffic calming.

They are best placed mid-intersection on roads with low speed limits.
