Product Name :
Electric Sightseeing Horse Carriage

Product Code :
UAETRV70002

Description :

Electric Sightseeing Horse Carriage

Technical Specification :

Number of passengers: 1-2 people can sit in the front and rear coachman position, and 4-6 people can sit in the body passenger position

Vehicle color: White (color support customization)

Whole vehicle structure: adopt high-quality galvanized steel plate, steel pipe, square steel, all-metal welded structure

Wrought iron styling: self-developed wrought iron pattern. All metal molds are used for manual bending, circle, layering, and cutting.

Steering technology: special large flat bearings are used as steering system

Shock absorption process: using automobile spring steel plates, each car has 8 shock absorption steel plates

Brake system: hydraulic foot brake, brake tube is copper tube

Wheel system: made of steel pipe and steel plate. Self-designed, and cooperated with domestic powerful wheel manufacturers to order carriage rims, relevant performance and parameters meet international standards

Tires: solid rubber tires for carriages, wear-resistant, high-temperature resistant, non-slip, corrosion-resistant, and anti-static.

The wheels and tires can be separated for easy maintenance.

Surface treatment: car paint process, two anti-rust treatments, three dust-free spray paint treatments.

Seat soft bag: Use E8 high-grade sponge, with good resilience, no collapse, and more comfortable.

Vehicle decoration: imported synthetic resin, corrosion-resistant, scratch-resistant, and not easy to break.
