Product Name :Square High Speed Emulsification Tank

Product Code: UAEPRSM0003

Description:

Square High Speed Emulsification Tank

Technical Specification:

Square bottom high speed emulsification tank is manufactured, examined, and approved teel welding normal pressure container" It adopts speed flow section to disperse and emulsify; the rotor guides flow out, which provide the liquid a vertical high speed cut to avoid quality difference between the upper and lower layer; the imported high quality emulsifying tip can work at the rotator speed high up to 2890 rpm, which have good dissolving and emulsifying effect on sugar .milk power and condiments production, and is the highest efficient machine among the equipments.
