

Product Name :
Carrot Beverage Processing Plant

Product Code :
PCPT0021

Description :

Carrot Beverage Processing Plant

Technical Specification :

Suitable for carrot processing, to produce clear juice, turbid juice, juice concentrate and fermented beverages. This production Plant is mainly composed of cleaning machine, elevating machine, blanching machine, cutting machine, crusher, preheater, pulper, sterilization machine and filling machine. This production Plant design features advanced design idea, high degree of automation; Main equipments are all made of high quality food grade stainless steel, accords with the hygienic requirements.

Raw material	Carrot
Finished product	Carrot drink
Capacity range	3tons/day to 1500tons/day
Fruit wine	fermented drinks, distillation wine, sparkling wine
Brix of juice	8.3~9.2Brix
Brix of concentrate	40~65Brix
Package options	Pull-ring can/glass bottle/plastic bottle
Design capacity	According to clients' requirements
